<p>Refrigerant leakage contributes to climate change. Refrigerant with lower global warming potential (GWP) would contribute less to global warming than a refrigerant with higher GWP, if leaked to the atmosphere. This appliance contains a refrigerant fluid with a GWP equal to [1975]. This means that if 1kg of this refrigerant fluid would be leaked to the atmosphere, the impact on globalwarming would be [1975] times higher than 1kg of CO2, over a period of 100 years. Never try to interfere with the refrigerant circuit yourself or disassemble the product yourself and always ask a professional. SkyTek products are manufactured by GD Midea Air-Conditioning Equipment Cp Ltd in accordance with EU norms and brand owner prescriptions. Compliant with EU Regulation 626/2011.</p>
